Subject: Re: 20170712 - MKI Response to EA Amendment Review Comments

As requested, Fisheries and Oceans Canada (DFO) has reviewed MKI's response against our comments on the "Amendment of MKI's Environmental Assessment of the Northeast Newfoundland Slope 2-D Seismic Survey Program, 2012-2017", submitted July 14, 2017. DFO has also factored in clarification from MKI on their response to our comment "….continue to investigate PAM options for future survey work.", received by email July 31, 2017. We find our comments have been adequately addressed.

Should you have any questions or comments regarding the above, you can contact me by phone at 772-6105 or by email (Catherine.andrews@dfo-mpo.gc.ca).

Cheers
Cathy
