

**Weekly Public Status Report of Oil and Gas Activities Offshore Newfoundland**

**As of: June 14, 2004**

Also on the Internet - <http://www.cnopb.nfnet.com/>

<b>GEOSCIENTIFIC PROGRAMS</b>					
<b>Program Number</b>	<b>Operator/Survey (Location)</b>	<b>Vessel/Contractor</b>	<b>Start Date</b>	<b>Km's Completed (Total Planned)</b>	<b>Comments</b>
8926-P028-015E	Petro-Canada (Terra Nova)	M.V. Anticosti/ Fugro Jacques Geosurviees	June 12, 2004	45 (750)	

<b>HIBERNIA DRILLING PROGRAM</b>						
<b>Well (Unique well identifier)</b>	<b>Location (NAD83)</b>	<b>Licence</b>	<b>Installation</b>	<b>Spud Date</b>	<b>Current Depth (Projected Total Depth)</b>	<b>Current Status</b>
HMDC Hibernia B-16 46 (346B164650048450)	46°45'01.198" N 48°46'53.653" W	PL 1001	Hibernia Platform M71 (East Rig)	May 19, 2004	2,443 (5,384 meters)	340mm casing set and cemented - currently testing BOP stack
HMDC Hibernia B-16 47 (347B164650048450)	46°45'01.967" N 48°46'54.944" W	PL 1001	Hibernia Platform M72 (West Rig)	June 2, 2004	795 (5,361 meters)	508mm casing set and cemented - currently drilling 406mm hole section

<b>TERRA NOVA DRILLING PROGRAM</b>						
<b>Well (Unique well identifier)</b>	<b>Location (NAD83)</b>	<b>Licence</b>	<b>Installation</b>	<b>Spud Date</b>	<b>Current Depth (Projected Total Depth)</b>	<b>Current Status</b>
Petro-Canada et al Terra Nova F-88 2 (302F884630048150)	46° 27' 20.014" N 48° 27' 41.866" W	PL 1002	Henry Goodrich	May 1, 2004	4,202 (4,202 meters)	Terminated as of June 11, 2004. Henry Goodrich mobilized Northwest glory hole to drill F-100 2.
Petro-Canada et al Terra Nova F-100 2 (302F004630048150)	46° 29' 26.040" N 48° 29' 11.229" W	PL 1002	Henry Goodrich	June 13, 2004	598 (4,529 meters)	762mm casing set and cemented -currently drilling 508mm hole section

Note: In July of 2001, the Henry Goodrich drilled and set the 762mm conductor casing which provided support for template A. This well was then suspended for re-entry at a later date. On June 13, 2004 the Henry Goodrich re-entered the well and will continue operations until the final total depth has been reached and the well has been completed.

<b>WHITE ROSE DRILLING PROGRAM</b>						
<b>Well (Unique well identifier)</b>	<b>Location (NAD83)</b>	<b>Licence</b>	<b>Installation</b>	<b>Spud Date</b>	<b>Current Depth (Projected Total Depth)</b>	<b>Current Status</b>
Husky Oil et al White Rose B-07 1 (300B074650048000)	46° 46' 14.31" N 48° 00' 38.42" W	SDL 1022	Glomar Grand Banks	October 18, 2003	3,658 meters	Currently running 178mm completion tubing.
Husky Oil et al White Rose B-07 2 (302B074650048000)	46° 46' 14.04" N 48° 00' 36.40" W	SDL 1022	Glomar Grand Banks	October 4, 2003	4,610 meters	Suspended at TD - preparing to run production tree
Husky Oil et al White Rose B-07 3 (303B074650048000)	46° 46' 13.14" N 48° 00' 36.92" W	SDL 1022	Glomar Grand Banks	October 9, 2003	970 meters	508mm hole drilled, 406mm surface casing set and cemented.
Husky Oil et al White Rose B-07 4 (304B074650048000)	46° 46' 13.41" N 48° 00' 38.35" W	SDL 1022	Glomar Grand Banks	October 14, 2003	3,998 meters	Production tree installed - well ready for completion following the completion of B-07 1
Husky Oil et al White Rose B-07 5 (305B074650048000)	46° 46' 14.11" N 48° 00' 36.66" W	SDL 1022	Glomar Grand Banks	October 6, 2003	1,025 meters	508mm hole drilled, 406mm surface casing set and cemented.
Husky Oil et al White Rose B-07 6 (306B074650048000)	46° 46' 13.56" N 48° 00' 38.87" W	SDL 1022	Glomar Grand Banks	October 14, 2003	3,719 meters	Suspended at final total depth – to be re-entered for completion at a later date.
Husky Oil et al White Rose B-07 7 (307B074650048000)	46° 46' 13.49" N 48° 00' 38.61" W	SDL 1022	Glomar Grand Banks	October 12, 2003	231 meters	914mm hole drilled, 762mm conductor casing set and cemented.
Husky Oil et al White Rose B-07 8 (308B074650048000)	46° 46' 14.24" N 48° 00' 38.16" W	SDL 1022	Glomar Grand Banks	October 2, 2003	231 meters	914mm hole drilled, 762mm conductor casing set and cemented.
Husky Oil et al White Rose J-22 1 (300J224700048000)	46° 51' 38.81" N 48° 03' 40.27" W	SDL 1028	Glomar Grand Banks	April 15, 2004	1,222 meters	406mm hole section drilled, 340mm casing set and cemented.
Husky Oil et al White Rose J-22 2 (302J224700048000)	46° 51' 39.62" N 48° 03' 39.93" W	SDL 1028	Glomar Grand Banks	April 24, 2004	1,215 meters	406mm hole section drilled, 340mm casing set and cemented.

BOP/BOP Stack:	Blowout preventers/blowout preventer stack - an assembly of heavy-duty valves attached to the wellhead to control well pressure and prevent a blowout.
Casing:	Steel pipe set in a well to prevent the hole from sloughing or caving and to enable formations to be isolated (there may be several strings of casing in a well, one inside the other).
Cementing:	Pumping a liquid slurry of cement, water and other additives behind a string of casing to isolate formations.
Completion/Completed:	The activities necessary to prepare a well for the production of oil or gas or the injection of water or gas into the reservoir.
Fish:	An object lost (or stuck) in the wellbore obstructing operations.
Fishing:	Operations to recover a fish.
Injecting:	Injecting water or gas into the reservoir for the purpose of maintaining reservoir pressure, Maximizing oil recovery and conserving resources.
Liner:	A length of casing suspended from the base of a previously installed casing string (a liner does not extend back to the surface of the well).
Logging:	Acquisition of downhole data using tools run in the well, usually on wireline.
Perforate/perforating:	Piercing the casing and cement using shaped explosive charges to provide a flow path for formation fluids.
Producing/Production:	Flowing oil and/or gas from a well to the production systems.
Production Tree:	An arrangement of heavy-duty valves and fittings installed on the wellhead to control flow from the well and/or to facilitate injection operations.
Reaming:	An operation to restore a wellbore to its original diameter (occasionally, a wellbore will cave in).
Seismic kilometres:	The total number of kilometres of data recorded in a geophysical program.
Shut-in:	A well in which the valves in the production tree have been closed to cease production or injection operations on a well.
Sidetracking:	The operation of deviating a well around a fish.
Spud:	The initial penetration of the ground or seafloor – the start of the drilling operation.
Suspension/Suspend:	The temporary cessation of drilling or production operations in a well.
Well workover:	A program of work performed on an existing well.
Wellbore:	The hole drilled by the drill bit.
Wellhead:	Steel equipment installed at the surface of the well containing an assembly of heavy duty hangars and seals (the wellhead is used to support the weight of casing strings hung from it and to contain well pressure).
