

Weekly Status Report of Oil and Gas Activities Offshore Newfoundland and Labrador
As of: June 21, 2010

GEOSCIENTIFIC PROGRAMS

Program Number	Operator/Survey (Location)	Vessel	Start Date	Km Completed (Km Planned)	Comments
8926-E038-003E	Exxon Mobil/Wellsite (Jeanne d'Arc Basin)	MV Anticosti	14-Jun-2010	0 km	Wait on weather

WELL OPERATIONS

Well (Unique Well Identifier)	Coordinates (NAD83)	Licence	Installation	Spud Date	Current Status (Current Depth / Projected Total Depth)
HMDC Hibernia B-16 SZ (305B164650048451)	46° 45' 1.542" N 48° 46' 53.488" W	PL 1001	Hibernia Platform M71 (East Rig)	May 18, 2010	Drilling Operations. (5,532m / 5,548m)
Husky et al North Amethyst G-25 3 (303G254650048000)	46° 44' 25.591" N 48° 03' 21.122" W	PL 1008/1006	GSF Grand Banks	February 23, 2010	Drilling Operations. (1,208m / 4,905 m)
Chevron et al Lona O-55 (300O554910047150)	49° 04' 47.95"N 47° 22' 55.14"W	EL 1074R	Stena Carron	May 10, 2010	Drilling Operations.

Completion Operations:	All operations associated with completing a well including installation of the production tree and all other operations associated with preparing a well for production or injection operations.		
Ice Delay:	Any downtime associated with pack ice or icebergs.		
Weather Delay:	Any downtime associated with heavy weather.		
Suspension/ Abandonment Operations:	All activities associated with either plugging and abandoning a well, or suspending a well as well as operations associated with demobilizing the drilling installation from the well.		
Well Intervention/Workover Operations:	All activities associated with performing a workover or well intervention.		

Glossary of Terms	
BOP Stack:	Blowout preventer stack - an assembly of heavy-duty valves attached to the wellhead to control well pressure and prevent a blowout.
Casing:	Steel pipe set in a well to prevent the hole from sloughing or caving and to enable formations to be isolated (there may be several strings of casing in a well, one inside the other).
Cementing:	Pumping a liquid slurry of cement, water and other additives behind a string of casing to isolate formations.
Fishing:	Operations to recover an object lost or stuck in the wellbore that is obstructing operations.
Injection/Injecting:	Injecting fluids into the reservoir to provide a driving mechanism for increased oil or gas production.
Logging:	Acquisition of downhole data using tools run in the well, usually on wireline.
Producing/Production:	Flowing reservoir fluids from a well to the production system.
Production Tree:	An arrangement of heavy-duty valves and fittings installed on the wellhead to control production from the well and/or to facilitate injection operations.
Reaming:	An operation to restore a wellbore to its original diameter (occasionally, a wellbore will cave in).
Seismic kilometers:	The total number of kilometers of data recorded in a geophysical program.
Sidetracking:	The operation of deviating a well around a fish.
Well Intervention/Workover:	An operation to repair equipment or to restore or increase production or injection.
