

Weekly Status Report of Oil and Gas Activities for Canada-Newfoundland and Labrador Offshore Area

As of: August 2, 2016

GEOSCIENTIFIC PROGRAMS

Program Number	Operator/Survey (Location)	Vessel	Authorization Date	Data Completed (Planned)			Current Status
				line km	km ²	Other	
47120-020-001	Western Geco/3D Seismic (Flemish Pass)	Amazon Conqueror	19-May-2016		6333.2 (10200)		845.7 km ² acquired during reporting period
45120-020-015	MKI/2D Seismic (NENL Slope)	Sanco Spirit	26-May-2016	7011.300 (16539.7)			Temporarily Suspended
45120-020-016	MKI/2D Seismic (South Grand Banks)	Atlantic Explorer	3-Jun-2016	8513.844 (17139)			600.125 km acquired during reporting period
45120-020-017	MKI/2D Seismic (Labrador Sea)	Sanco Spirit	1-Jul-2016	1665.225 (6201)			1136.475 km acquired during reporting period

WELL OPERATIONS

Well (Unique Well Identifier)	Coordinates (NAD83)	Licence	Installation	Spud Date	Current Status (Current Depth / Projected Total Depth)
Husky Oil et al North Amethyst E-18 12Y 312E184650048002	46° 47' 21.2174"N 48° 02' 37.6869"W	PL 1006/PL 1007	Henry Goodrich	18-Jun-2016 (Sidetrack)	Completion Operations: (4,415m/4,429m)
HMDC Hibernia P-02 7 307P024650048450	46° 41' 53.015" N 48° 44' 58.291" W	PL 1005	West Aquarius	22-Jun-2016	Suspended: (3,983m/4,282m)
HMDC Hibernia P-02 8 308P024650048450	46° 41' 52.864" N 48° 44' 57.676" W	PL 1005	West Aquarius	25-Jun-2016	Drilling Operations: (3,307m/3,572m)
Statoil et al Bay de Loup M-62 300M624800046150	47° 51' 48.7098"N 46° 25' 19.4242"W	EL 1112	Skandi Achiever	14-Mar-2016	Terminated
Statoil et al Harpoon O-85 300O854810046000	48° 04' 52.0" N 46° 12' 18.9" W	EL 1112/EL 1124	Skandi Achiever	1-Apr-2013	Terminated

Categories of Operations	
Mobilizing to Wellsite:	All activities associated with mobilizing the drilling installation/drilling rig to the well.
Preparing to Spud:	All pre-spud activities from the time that the drilling installation arrives on location until the well is spudded (initial penetration of the seafloor to start the drilling of a well).
Drilling Operations:	All operations associated with drilling a well including casing, cementing, running BOP stack, fishing, sidetracking, reaming, logging, coring and formation flow testing as well as
Completion Operations:	All operations associated with completing a well including installation of the production tree and all other operations associated with preparing a well for production or injection
Ice Delay:	Any downtime associated with pack ice or icebergs.
Weather Delay:	Any downtime associated with heavy weather.
Suspension/Abandonment Operations:	All activities associated with either plugging and abandoning a well, or suspending a well as well as operations associated with demobilizing the drilling installation from the well.
Well Intervention/Workover Operations:	All activities associated with performing a workover or well intervention.
Operation Suspended	Any suspension operation for reasons other than equipment failure or ice or weather delay.

Glossary of Terms	
BOP Stack:	Blowout preventer stack - an assembly of heavy-duty valves attached to the wellhead to control well pressure and prevent a blowout.
Casing:	Steel pipe set in a well to prevent the hole from sloughing or caving and to enable formations to be isolated (there may be several strings of casing in a well, one inside the other).
Cementing:	Pumping a liquid slurry of cement, water and other additives behind a string of casing to isolate formations.
Fishing:	Operations to recover an object lost or stuck in the wellbore that is obstructing operations.
Injection/Injecting:	Injecting fluids into the reservoir to provide a driving mechanism for increased oil or gas production.
Logging:	Acquisition of downhole data using tools run in the well, usually on wireline.
Producing/Production:	Flowing reservoir fluids from a well to the production system.
Production Tree:	An arrangement of heavy-duty valves and fittings installed on the wellhead to control production from the well and/or to facilitate injection operations.
Reaming:	An operation to restore a wellbore to its original diameter (occasionally, a wellbore will cave in).
Seismic kilometers:	The total number of kilometers of data recorded in a geophysical program.
Sidetracking:	The operation of deviating a well around a fish.
Well Intervention/Workover:	An operation to repair equipment or to restore or increase production or injection.
