Dear Mr. Murphy,

Subject: BHP Environmental Assessment Report for Seabed Survey

BHP is please to submit the attached Environmental Assessment Report for a Seabed Survey. The EA Report considers the factors and issues listed in the Scoping Document dated 07 October 2019 as well as agency review comments provided to the Project Description.

The initial seabed survey is planned between May and October 2020, pending authorization from the C-NLOPB. The scope of the survey is to identify sensitive environmental seabed features, anthropogenic and geological features in the vicinity of prospective well locations.

We look forward to your review and feedback. Should there be any comments or questions please contact our Regulatory Lead, Collette Horner at collette.horner@bhp.com.

Sincerely,

Drew Carlock
Manager Geoscience, Canada License
