Subject: Re: BP - Ephesus CSEM Survey - EA Report

Hi Darren,

Thank you for providing the EA Report for the BP Ephesus Prospect CSEM Survey for review. It would be useful if the mapping done for this project EA delineated the Northeast Slope Marine Refuge with fixed gear fishing activity. Fixed gear fishing for turbot (Greenland turbot) occurs mostly along the shelf-break and is not permitted within the refuge. The seasonality varies from year to year but this fishery can occur from June to October. This wasn't clear in the document. Depending on the exact location of this project there may need to be some considerations taken for the turns of the project vessel. Deployment of a Fisheries Liaison Officer for the project will help communication at-sea as well as in the event of other possible activity in the refuge.

If you have any questions please do not hesitate to contact me.

Kind regards,
Robyn

Subject: BP - Ephesus CSEM Survey - EA Report

Hello All,

Please see the attached letter from the C-NLOPB and the Environmental Assessment Report for BP Canada Energy Group ULC's Ephesus Prospect Controlled Source Electromagnetic (CSEM) Survey. The C-NLOPB has requested comments by close of business July 2, 2020. If no comments are submitted, the C-NLOPB will assume none will be provided.

For further details, please visit the project page here:

<https://www.cnlopb.ca/assessments/bp-canada-energy-group-ulc-ephesus-prospect-controlled-source-electromagnetic-csem-survey-2020/>

Please contact me if you have any questions.

Regards,
Ian
