To whom it may concern,

On reading the description of this drilling plan for the Gulf of St Lawrence, I was concerned about the ambiguity in the Miscellaneous section regarding the discharge of chemicals offshore.

I am also concerned about who takes financial/environmental responsibility if there is malfunction/disaster.

The location of this site will affect not only NL and Labrador, but PEI and NS if chemicals are discharged, plugs malfunction or oil spills. This could ruin PEI livelihood in fishing, farming and tourism.

In this day and age, in the wake of the BP and Japanese tragedies, it saddens me to see our tax dollars continue to support this "last century mindset" instead of looking forward, being innovative and pursuing safer, more sustainable resources for maritime provinces such as:

offshore wind farms
lunar (tidal) power

thank you for this opportunity to comment on this plan (which I do not support),

Harmony Wagner, R.Ac
