Subject: RE: Electromagnetic Geoservices Canada, Inc. - Western Newfoundland Controlled Source Electromagnetic (CSEM) Project, 2017

Hi Darren,

NRCan has reviewed the EIS with regards to seismicity and marine geology/geomorphology and has no comments to submit. In checking with our earth sciences experts, it sounds like we generally don't have anything to flag with these projects because of their short duration and the nature of their operation.

If you have any question, please don't hesitate to contact me.

Hi: the webpage is currently being updated and doesn't have the link to the EA Report yet. I have attached an electronic version of the EA Report and we have asked for review comments by July 26, 2017.

If you have any questions please feel free to contact us.

Cheers
Darren

Hi Darren,

A colleague in my office forwarded your email to me. I'll be handling all of the offshore projects for NRCan. Would you be able to send me a link directly to the EIS? The link forwarded to me went to a page of documents but the most recent was a scoping document from 2016. I couldn't see the EIS. If you could provide a link directly to the EIS, I'll review it and provide a response as soon as possible.
