Re: Electromagnetic Geoservices Canada Inc. Non-Exclusive Controlled Source Electromagnetic Project,
2014-2018 Environmental Assessment Responses to Comments

Hi Darren,

The FFAW-Unifor has gone through the responses provided by Electromagnetic Geoservices Canada Inc., to the comments provided to the Environmental Assessment (EA) for the proposed Non-Exclusive Controlled Source Electromagnetic Project.

FFAW|Unifor would suggest that the comments on lack of communication stand. The proponent would have had ample opportunity continuing to provide information to stakeholders. It is also apparent that the communication mentioned in the response was sent out one week after the comments on the Addendum were submitted to the C-NLOPB. FFAW|Unifor would suggest that open lines of communications should be strived for, even when it comes to the uncertainties about timing and execution of planned activities.

The FFAW-Unifor continues to be available for consultations between the proponent and fishing industry.

Yours truly,

Jóhan Joensen
Petroleum Industry Liaison
