East Canada CSEM Survey 2014-2018

Dear Elizabeth

In July 2014 EMGS initiated an extensive non-proprietary CSEM campaign in the offshore waters of East Canada.

EMGS is currently planning to return to East Canada for the 2015 season and anticipates to have a vessel/s in the region tentatively by May this year.

We have attached for your review an Amendment to EMGS' 2014 EA which will assess two changes to the original Project Description: (1) concurrent use of two CSEM vessels; and (2) extension of the annual temporal scope from 30 November to 31 December. Both of these amendments would apply for the remainder of the program (i.e., 2015-2018).

We look forward to your feedback regarding this Amendment and as always, if you should require any additional information or have any enquiries at all, please do not hesitate to contact me.

Yours sincerely
