Subject: RE: Fugro GeoSurveys Offshore Seafloor and Seep Sampling Program, 2017-2027

Hi Darren,

We have reviewed the response provide by Fugro to our additional review comments. We are satisfied with the commitment to visual confirmation of the benthic character and presence of coral or sponge aggregations at all planned seabed survey locations within NAFO VMEs. We do not, however, consider the mitigation to cap the number of core and heat flow probes to be redundant based on this commitment.

Please feel free to contact me with any questions or concerns.

Best,  
Kim
