Subject: RE: Fugro GeoSurveys Offshore Seafloor and Seep Sampling Program, 2017-2027
Attachments: Fugro SitesOfConcern.xlsx; EasternNewfoundland_Fugro_Nov2017.pdf

Upon further review of this project (Fugro GeoSurveys Offshore Seafloor and Seep Sampling Program, 2017-2027), DND provides the following information and recommendations:

The UXO Program conducted a search of their database and identified five UXO sites of concern in that area (see attached) along with a number of shipwrecks.

Due to the fact there may be uncharted shipwrecks or other UXO sites or munition dumps, in the event activities are conducted that have contact with the seabed (such as drilling or mooring), it is strongly advised that operational aids, such as remotely operated vehicles, be used to conduct seabed survey in order to prevent unintentional contact with shipwrecks or dumpsites that are not noted on the maps or harmful UXO items.

Subject: RE: Fugro GeoSurveys Offshore Seafloor and Seep Sampling Program, 2017-2027

Good afternoon All: please see the attached amendment to the temporal scope of the above mentioned program. The EA Amendment assesses the environmental effects of extending the Project activities into December, 2017 through 2027 (from the current May to November, 2017 through 2027 timeframe). If no comments are received by November 23, 2017 then the C-NLOPB will assume none will be provided, earlier replies are welcome.

Further details on this project may be found at
<http://www.cnlopb.ca/assessments/fugrogeosurv.php>.

Regards
Darren
