Subject: RE: GX Technology Canada Ltd. GrandSPAN Marine 2D Seismic, Gravity and Magnetic Survey, 2014 to 2018

Hi Darren,

Thank you for forwarding the response for review.

While we appreciate GXT's responses to our identified issues, we would like to stress once again that evidence on the effects of seismic operations on fish species has not been agreed upon and evidence exists in the literature to support both sides of the argument. Thus, until there is sound evidence that points in one direction we have concerns about the effects of seismic on key commercial fisheries.

Similarly, the 7 day temporal/30 km spatial separation mitigation is equally as troublesome until these effects are known. For this reason we once again stress that no overlap is to occur between seismic activity and the Post-Season Snow Crab Survey stations until these stations have been completed.

Thank you,

Projects Coordinator

Good morning: on March 11, 2016 I forwarded a "Response to Reviewer Comments" for your review to determine if comments made by FFAW-Unifor on the proposed EA Amendment for the above mentioned program were satisfactorily addressed. A reply at your earliest convenience is appreciated.

Further details on this project may be found at
