Subject: RE: Hebron 2016 EA Update

Darren,

EC requests additional information regarding installation of the Single Load Anchor. Section 2.1.2 indicates pile excavation to a depth of approximately 6 meters using a soil plug removal tool.

Please ask the Proponent to clarify how and where the soil plug will be disposed.

Best regards,  
EA Coordinator, Environmental Stewardship Branch

Subject: Hebron 2016 EA Update

Good Day All,

As part of the C-NLOPB's environmental assessment process, and as outlined in our Screening reports for multi-year projects, at the time of application for authorizations for works or activities that were previously assessed, Operators must provide environmental information to the Board. As stated in our screening reports, this information should outline the proposed activities, confirm that the proposed program activities fall within the scope of the previously assessed program, and indicate if, with this information, the EA predictions remain valid. In addition, the Operator shall provide information regarding the adaptive management of requirements of the SARA into program activities (e.g., introduction of new species or critical habitat to Schedule 1; additional mitigations; implementation of recovery strategies and/or monitoring plans).

Attached is a recent submission from ExxonMobil Canada Properties Ltd. for proposed activities in 2016 that addresses the above information requirements. The C-NLOPB requests that your department take note of Section 2.5 of the attached report. If you have any questions, please contact me at your convenience.

Regards  
Darren
