Subject: RE: Comments on Hebron 2013 EA Update: Hebron Project Comprehensive Study Report

Darren

The EA update states that all mitigations outlined in the Hebron Project CSR pertaining to described activities will be implemented during the 2013 survey programs.

While seabird observations during seismic surveys were not specifically mentioned in the EA update, they are one of the mitigations/observations identified in the CSR. We can confirm that for the 2013 seismic surveys, it is our intention to carry out seabird observations with trained observers using the protocols established in Appendix 2 of the Geophysical, Geological, Environmental and Geotechnical Program Guidelines (C-NLOPB 2012), and a copy of the observation report will be provided to CWS.

Regarding DFO's advice to contact them concerning the timing of the 2013 DFO research vessel schedule, our plan is to contact DFO to confirm the exact timing and locations of research surveys.

These commitments are also identified in the CSR addendum, which we will submit today.

Kim

In addition to our e-mail yesterday (June 4, 2013) please see the additional comments that were received on the EA Update. Transport Canada had no comments.

Please note that these comments need to be included in both your revised update and addendum to the CSR.

Please feel free to contact us if you have any questions.

Regards

Darren
