Subject: ExxonMobil Canada Properties Hebron Development Project Amendment

Good afternoon Darren,

As per our conversation, I have no comments with respect to the Project Amendment, as there is no mention of radio communication systems.

Radio communication systems (including antenna and their supporting structure) in such project could be considered a maritime operation, and would be similar to any other maritime vessel; where its structures are insignificant relative to the actual facility, be it on a ship or an off-shore structure.

In this instance, radio communication systems are ancillary to the main project and would not cause any significant adverse environmental effects. As such, I am requesting that consideration be given to exclude our Department from further EA related work to this project.

Thanking you in advance for the consideration.

Regards,  
Spectrum Portfolio Manager, Spectrum Management Operations Branch  
Innovation, Science and Economic Development Canada / Government of Canada

Good morning: this is an email reminder that comments on the Amendment for the above mentioned program were due yesterday, July 3. Please advise when and if you will be submitting comments.

Regards  
Darren
