Subject: RE: ExxonMobil Canada Properties (EMCP) Hebron Development Project

Hi Darren,

NRCan has reviewed this update and has no comments to submit. Within the update EA document they do not mention issues with drilling. With other updates, the proponent has specifically mentioned this and for a few we have commented that we recommend the proponent use post- Macondo oil spill modelling to update their oil spill predictions and mitigation measures. However, we have reviewed the current update based only what was presented in the update document by the proponent. At the upcoming offshore workshop, I think this is an issue we should discuss as we want to ensure consistency in our reviews of these updates. However, we can only review based on the information in the update document. If the update documents are quite different from project to project, perhaps this is something that needs to be considered in the workshop.

Cheers,

From: Hicks, Darren [mailto:DHicks@cnlopb.ca]

Subject: RE: ExxonMobil Canada Properties (EMCP) Hebron Development Project

Good morning All: EMCP has submitted an amendment to its Hebron Development Project, please see the attached. The C-NLOPB is requesting that comments be submitted by close of business July 3, 2017. If no comments are submitted by this date then the C-NLOPB will assume no comments will be submitted by your department.

Further details on this program may be found at
