Dear Ms. Young:

Re: 2017 Hebron – Environmental Assessment (EA) Amendment

In support of future operational activities, and in accordance with guidance provided by the Environmental Affairs staff, enclosed is the 2017 EA Amendment to the 2011 Hebron Project Comprehensive Study Report (CSR).

This 2017 EA Amendment describes and assesses a proposed modification to the Project as compared to that which was originally assessed, approved and implemented pursuant to the EA review and approval process. In particular, this planned modification relates to the disposal of a discreet portion of synthetic based drilling mud (SBM) associated drill cuttings from the Hebron Platform to ensure the reliability of the cuttings-reinjection system.

This amendment was originally submitted May 25th. This version was revised to include supplemental technical information regarding the dispersion model in Appendix B per the Board's request via email on June 1st with further clarifications on June 6th.

Should you have any questions, or require further information, please contact [REDACTED] Environmental Advisor [REDACTED] at your convenience.

Yours truly,

[REDACTED]
Environmental and Regulatory Supervisor
