**Re: Husky Energy – New Drill Centre Construction & Operations Program
Environmental Assessment (CEAR 06-01-17410)**

On May 4, 2009, Husky Energy submitted to the Canada-Newfoundland and Labrador Offshore Petroleum Board (C-NLOPB) the enclosed report, “*Husky White Rose Development Project New Drill Centre Construction and Operations Program Environmental Assessment Amendment: Construction of Protective Flowline Rock Berms*” (LGL 2009).

Husky proposes the construction of rock berms to serve as protection for flowlines in the vicinity of the Southern Drill Centre (SDC) and the North Amethyst Drill Centre (NADC). Construction of these protective rock berms may occur year-round for the period 2009 to 2020.

The LGL 2009 report constitutes an amendment to the *Husky Energy Drill Centre Construction Installation and Operation Program* environmental assessment that was completed in 2007. The reports entitled “*Husky White Rose Development Project: New Drill Centre Construction and Operations Program Environmental Assessment*” (LGL 2006) and “*Husky White Rose Development Project: New Drill Centre Construction and Operations Program Environmental Assessment Addendum*” (LGL 2007) were the principal documents supporting that EA.

Please review the enclosed environmental assessment amendment report and forward comments to me no later than **June 2, 2009**. If you have any questions on the attached, I may be reached at 709-778-4232 or via email at eyoung@cnlopb.nl.ca.

Yours truly,
