Mr. Don Williams
Manager, Health, Safety, Environment and Quality
Husky Energy
Suite 901, Scotia Centre
235 Water Street
St. John's, NL A1C 1B6

Dear Mr. Williams:

**Re: Husky White Rose Development Project
New Drill Centre Construction and Operations Program
Environmental Assessment Amendment:
Construction of Protective Flowline Rock Berms**

The Canada-Newfoundland and Labrador Offshore Petroleum Board (C-NLOPB), in consultation with the Board's fishery and environmental review agencies, has reviewed the environmental assessment (EA) report "*Husky White Rose Development Project New Drill Centre Construction and Operations Program Environmental Assessment Amendment: Construction of Protective Flowline Rock Berms*" (April 15, 2009). The EA report is an amendment to the "*Husky White Rose Development Project: New Drill Centre Construction and Operations Program Environmental Assessment*" (LGL 2006) and Addendum (LGL 2007) and was provided by Husky Energy in support of the request to construct rock berms to serve as protection for flowlines in the vicinity of the Southern Drill Centre and the North Amethyst Drill Centre.

Enclosed are comments from federal fisheries and environmental agencies and Board staff on the review of the EA report. These comments should be addressed and provided to the Board before the EA report is deemed acceptable.

If you have any questions on the attached, I can be contacted at (709) 778-4232 or at eyoung@cnlopb.nl.ca.

Yours truly,

Original signed by E. Young

Elizabeth Young
