TOTALS	9,725.80	608.16	72.92	10,323.71	2,465.22	27,760.73	33,027.76	73,797.86	

Notes:

- Updated April, 2023
- Numerical Units are in millions of dollars
- Exploration Costs include Wellsite Surveys, Seismic Surveys, Exploration Wells and (usually) Delineation Wells
- Pre-Development Costs typically include expenditures which advance a project to the Development Phase such as Engineering and Conceptual Studies, Office Costs and costs in support of preparing a Development Application
- Development Costs are costs expended from receipt of the Development Application to First Oil production
- Production Costs are costs expended from First Oil production to the end of Production
- Delineation wells are included under Exploration costs with the exception of a 2008 N. Amethyst well and a 2010 N. Amethyst well included in Construction phase costs
- Total expenditure amount for 2019 was updated in 2021 due to error in reporting of expenditures by operator.
