Subject: RE: Hibernia Management and Development Company Ltd. (HMDC) 2D/3D/4D Seismic Projects for the Hibernia Oil and Gas Production Field, 2013 to Remaining Life of Field AMENDMENT

Hi Darren,

The main concern I have with the addition to this project is that the profiler will be towed behind the chase boat while the FLO will be on the seismic vessel quite a distance behind. Depending on the timing of the usage of the profiler (and associated fisheries in the area) it may be worthwhile for the company to consider an additional FLO be deployed on the chase boat to mitigate any potential for fishing gear damage. The snow crab fishery is now closed but the post-season crab survey will be starting in September so fixed gear will be set in the water throughout the fall. Gear will be set however in fixed locations that the crew onboard the chase boat can access through the company, DFO or the FFAW.

Other than your emails regarding this addition we have not had any contact from the company on the added scope.

Thanks,

From: Hicks, Darren [DHicks@cnlopb.ca]

Hello all: attached is an EA Amendment for HMDC to use a sound velocity profiler during their recently assessed multi-dimensional seismic program.

The C-NLOPB requests that comments and replies be submitted by close of business July 27, 2015.

If you have any questions please feel free to contact me.

Further details on this project may be found at
<http://www.cnlopb.ca/assessments/hmdcjdb.php>

Cheers
Darren
