

Darren,  
as per the Geophysical, Geological, Environmental and Geotechnical Program Guidelines "Communication throughout survey operations with fishing interests in the area should be maintained. The use of a 'Fisheries Liaison Officer' (FLO) onboard the seismic vessel is considered best practice in this respect." Husky also considers the use of a FLO best practice and will reference One Ocean's Risk Management Matrix in the planning and execution of all 2D and 3D seismic programs.

Regards,

Dave.
