Dear Mr. Hicks:

As requested, the Department of National Defence (DND) has reviewed documentation sent with respect to the “2017-2026 Multiklient Invest AS Newfoundland and Labrador Offshore Seismic Program”.

MARLANT Safety and Environment (MARL SE) has the following comments:

- Please identify a specific individual or office to serve as a Point Of Contact (POC) for MARLANT queries and concerns;
- Please ensure the appropriate Notice to Mariners is issued for all underwater activities and any significant surface ventures, such as use of flares, buoys, and unconventional night lighting;
- Please ensure the appropriate Notice to Airmen is issued for all activities that could affect air safety, such as use of balloons, Unmanned Aerial Vehicles (UAVs) or tethered airborne devices; and
- Please ensure engagement of CTF 84, through Director General Naval Strategic Readiness (DGNSR), to ensure de-confliction with possible Allied submarine activities.

Due to the inherent dangers associated with UXO and the fact that the Northwest Atlantic Ocean was exposed to many naval engagements during WWII, should any suspected UXO be encountered during the course of the operations, the Proponent should not disturb/manipulate it. The Proponent should mark the location and immediately inform

Canada

the Coast Guard. Additional information is available in the 2010 Annual Edition – Notices to Mariners, Section 37. Further UXO general information is available on our website at www.uxocanada.forces.gc.ca.

Should you have any questions or require any additional information please do not hesitate to contact me.

Sincerely,

MARLANT Safety and Environmental Officer
for Commander
