

Nunatsiavut Government

General Comment

The Nunatsiavut Government recommends that, if the Project is approved, MKI identify and allocate in its detailed Project budget, financial support for marine environmental management programs along the Labrador coast for the duration of the proposed Project.

MKI Response

MKI would be willing, in coordination with other companies, to allocate in its project budget, financial support for marine environmental management programs along the Labrador coast for the duration of the proposed project in an amount to be determined by MKI in appropriate percentages.
