Subject: RE: Multi Klient Invest AS Southern Grand Banks Seismic Program, 2014 to 2018

Hello Darren:

Further to your email below please note that I have reviewed the submitted information against comments submitted with respect to review of the initial EA Report and documented in my May 1, 2014 letter to you on same.

The Addendum for the most part addresses each of the points outlined in the May 1, 2014 letter with the following exception:

- Table 4.13 (page 124) Atlantic salmon should be listed as separate populations with their respective COSEWIC status
  - While the response provided in the Addendum is acceptable in the interest of clarity it is felt that footnotes should be added to each respective COSEWIC status noting which populations of Atlantic Salmon are considered Endangered, Threatened and/or Special Concern accordingly. This information is available from the COSEWIC website and may be added at the bottom of the table.

I trust that this will be helpful, If you have any questions please let me know.
