Subject: Nalcor Energy - Geochemical Data Acquisition and Seabed Sampling for Basin Modelling in Labrador Offshore (2013 to 2018)

Good afternoon,

Nalcor Energy wishes to withdraw their application "Geochemical Data Acquisition and Seabed Sampling for Basin Modelling in Labrador Offshore (2013 to 2018)". We have become aware of a company planning to undertake a similar program offshore Labrador. It is in Nalcor's best interest not to replicate a program that another industry company intends to undertake and to instead licence the data from that company once it is available.

Please advice on any procedures required for withdrawal of an application.

Take care,

Geologist
