Subject: RE: Nexen Eastern Newfoundland Offshore Geophysical, Geochemical, Environmental and Geotechnical Program (2018 - 2027)

Hi Darren,

Further to this request, thank you for the opportunity to review the Scoping document, request for expertise, and project description for Nexen's proposed Eastern Newfoundland Offshore Geophysical, Environmental and Geotechnical Program (2018-2027).

The proposed project area covers a vast amount of valuable, commercial fishing ground. Ensuring these activities are not interrupted or negatively affected is the key focus of our organizations, as these important fisheries are the lifeblood of our membership and their communities.

To date we have developed strong relationships with petroleum and seismic companies through open communication and extensive consultation. We expect these elements will be important to Nexen and hope the company appreciates the importance to our members.

Considerations for the current protocol around the Post Season Snow Crab Survey, as well as ensuring harvesters have reassurance that appropriate compensation measures are in place in the case of a future incident that impacts their livelihoods will need to be aspects of the consultation process.

We look forward to further consultation and discussion with Nexen.

Good morning: this is an email reminder that comments on the project description and draft scoping document were due yesterday concerning this project. If you are intending on submitting comments could you please indicate when we may expect their submission. If the C-NLOPB does not hear back then we will assume no comments will be submitted.

Regards  
Darren
