Darren:

No comments based on review of the EA Amendment the analysis seems to be logical and in keeping with conclusions reached in original project EA. That being said I offer two very minor comments:

- * Last sentence Page 12 – Figure 4 does not depict the NAFO fishing “footprint”
- * Section 4.2.3.1 page 21 - last sentence notes that “... Statoil will share results of coral surveys with interested researchers..” Please add me to the “interested researchers”.

If any questions let me know.
