Subject: Suncor Energy's 2013 EA Review/Update of Petro-Canada Jeanne d'Arc Basin Exploration Drilling Program, CEAR No. 08-01-42400  
Attachments: Suncor 2013 EA Update.pdf

Hello: Please find attached the 2013 review of Suncor Energy's Environmental Assessment of the Petro-Canada Jeanne d'Arc Basin Exploration Drilling Program, 2009-2017 (December 2008) & Addendum (April 2009) - CEAR No. 08-01-42400. The Terra Nova West Flank delineation well is scheduled to be drilled this summer on the Terra Nova Production License (PL) 1002.

As part of the C-NLOPB's environmental assessment process, and as outlined in our Screening reports for multi-year projects, at the time of application for authorizations for works or activities that were previously assessed, Operators must provide environmental information to the Board. As stated in our screening reports, this information should outline the proposed activities, confirm that the proposed program activities fall within the scope of the previously assessed program, and indicate if, with this information, the EA predictions remain valid. In addition, the Operator shall provide information regarding the adaptive management of requirements of the SARA into program activities (e.g., introduction of new species or critical habitat to Schedule 1; additional mitigations; implementation of recovery strategies and/or monitoring plans).

Attached is a recent submission from Suncor Energy for proposed activities in 2013 that addresses the above information requirements. I am forwarding it for your information and to provide you with an update of their activities for this year. If you have any questions, please contact me at your convenience.

More information may be found at <http://www.cnlopb.nl.ca/environment/hebron.shtml>

Cheers  
Darren
