

## Quality Policy

The C-NLOPB's vision is to be a world-class regulator and to be recognized as such. The C-NLOPB strives to be fair, consistent and objective in its application of the *Atlantic Accord Acts* and subordinate regulations in its oversight of offshore petroleum activity. To achieve this, the C-NLOPB has the following specific goals:

- **Operational Efficiency and Effectiveness**
  - The C-NLOPB will ensure that staff have clearly defined roles and responsibilities and are qualified and competent to perform the work.
  - The C-NLOPB will ensure that it has an optimal organizational structure to support efficient and effective operations.
  - The C-NLOPB will have processes that enable efficient and effective assessment of applications and prudent oversight of petroleum-related work or activity in a consistent manner.
  - The C-NLOPB will have administrative policies and procedures that are current, easy to understand and reflect best practices.
  
- **Effective Change Management**
  - The C-NLOPB will ensure that it is prepared to anticipate and react to external changes including fluctuations in level of offshore activity, emerging technologies and changes in its legislative regime. The C-NLOPB will identify and manage change effectively in responding to changes in both the internal and external environment.
  
- **Effective Information and Data Management**
  - The C-NLOPB will ensure that information that is procured or produced by the C-NLOPB is captured and curated in a complete, accurate and timely manner and is accessible by appropriate users.

The C-NLOPB is also committed to the monitoring and continual improvement of its processes to ensure that the above goals will be achieved.
