1.0. INTRODUCTION

1.1. INTENT

The C-NLOPB is seeking Proposals for the supply and delivery of equipment and licensing for a Nutanix-based Application Delivery System.

The intent of this RFP is to modernize the Application Delivery System infrastructure at the C-NLOPB. Two Nutanix-based solutions have been identified which may be used, as outlined in APPENDIX “A” – SCOPE OF WORK. We are seeking quotes for both options, and invite interested Proponents to submit a Proposal for either or both qualified options.

More detail on the opportunity and requirements can be found within this RFP.

1.2. OVERVIEW

The C-NLOPB is responsible, on behalf of the Government of Canada and the Government of Newfoundland and Labrador, for the regulation of petroleum-related activity in the Canada-Newfoundland and Labrador Offshore Area.

The C-NLOPB’s authority is derived from the legislation implementing the February 11, 1985 Atlantic Accord between the two governments. The Canada-Newfoundland and Labrador Atlantic Accord Implementation Act and the Canada-Newfoundland and Labrador Atlantic Accord Implementation Newfoundland and Labrador Act provide for joint management of the Canada-Newfoundland and Labrador Offshore Area.

Pursuant to the legislation above, the C-NLOPB regulates in the areas of offshore workplace health and safety, environmental protection, resource management and industrial benefits.

While funded by both the federal and provincial governments, the C-NLOPB operates as an independent entity with the powers of a corporation under the Canada Business Corporations Act, and is responsible for recovering its costs in regulating offshore petroleum activity from applicants and operators on behalf of both governments.
