

**Chief Safety Officer Decision (Regulatory Exemption)**

**Date:** 10 June 2010

**Applicant:** Husky Energy

**Applicant reference:** WR 0155

**Installation name:** SeaRose FPSO

**Regulation:** Subsection 8(2) of the Newfoundland Offshore Petroleum Installations Regulations

**Decision:**

The Chief Safety Officer authorizes the applicant, the Operator for the SeaRose FPSO, to conduct the following activities, while production is ongoing , namely:

1. Repairing the hand railing at the stern of the SeaRose FPSO,
2. Installing a roller for improved hawser handling on the deck just forward of the offloading hose reel; and
3. Repairing the Stern Discharge System (SDS) crane.

subject to the Applicant risk assessing and identifying the hazards associated with the three hot work scopes, incorporating additional gas detection equipment and carrying out all hot work under the FPSO's hot work permit system as outlined in RQF WR 0155 and DNV letter ANMCA483/RKEN/24492-J-11221 dated 9 June 2010-06-09.
