Subject: RE: Seitel Canada Ltd. East Coast Offshore Seismic Program, 2016-2025

Hi Darren,

I have two comments to make on these documents:

Draft Scoping document – section 5.2.10 – Given the large temporal scale of this proposed EA (2016-2025) it would be appropriate for recent scientific literature on effects of survey activity, including identified data gaps, to include groundfish species (vertebrates), as well as the noted invertebrate species.

Seitel Project Description – page 11 – Given the large spatial scale of this proposed EA we do not consider consultations held only in St. John's and various locations in Labrador to be appropriate. A large proportion of ocean users (i.e. fish harvesters) reside throughout Newfoundland and consultations should therefore be held at additional locations on the island to enable harvesters to participate in these consultations.

If you have any questions please do not hesitate to contact me.

Kind regards,
Petroleum Industry Liaison
Fish, Food and Allied Workers (FFAW) Union

Hello all: please see the attached project description, DRAFT Scoping Document and letter from the C-NLOPB requesting feedback. Please reply by close of business December 3, 2015.

If you have any questions please feel free to contact me.

Regards
Darren
