

CNOOC International Exploration Drilling

Date: Dec 4th, 2019

FORWARD LOOKING STATEMENTS

Certain statements in the presentation may contain “forward looking statements”, including statements regarding expected future events, business prospects or financial results. These statements are based on assumptions and analyses made by CNOOC Petroleum North America ULC (“CNOOC N.A.”) a wholly owned subsidiary of CNOOC Limited (the “Company”) in light of its or their experience and perception of historical trends, current conditions and expected future developments, as well as other factors that CNOOC N.A. or the Company believes reasonable under the circumstances.

However, whether actual results and developments will meet CNOOC N.A.’s or the Company’s expectations and predictions depends on a number of risks and uncertainties which could cause the actual results, performance and financial conditions to differ materially from the Company’s expectations, including those associated with fluctuations in crude oil and natural gas prices, the exploration or development activities, the capital expenditure requirements, the business strategy, whether the transactions entered into by CNOOC N.A. or the Company can be completed on schedule pursuant to its timetable or at all, the highly competitive nature of the oil and natural gas industries, the foreign operations, environmental liabilities and compliance requirements, and economic and political conditions in the People’s Republic of China. For a description of these and other risks and uncertainties, please see the documents the Company has filed from time to time with the United States Securities and Exchange Commission, including their most recent annual report on Form 20-F and current reports on Form 6-K.

CNOOC International is a global energy company with a vision of delivering safe, sustainable energy for all.

“DO IT SAFELY.... OR NOT AT ALL”

Safety First

Identify and communicate Safety Management risks to help protect the safety and well-being of myself, my co-workers and the communities and environment.

Step Up & Do it Right

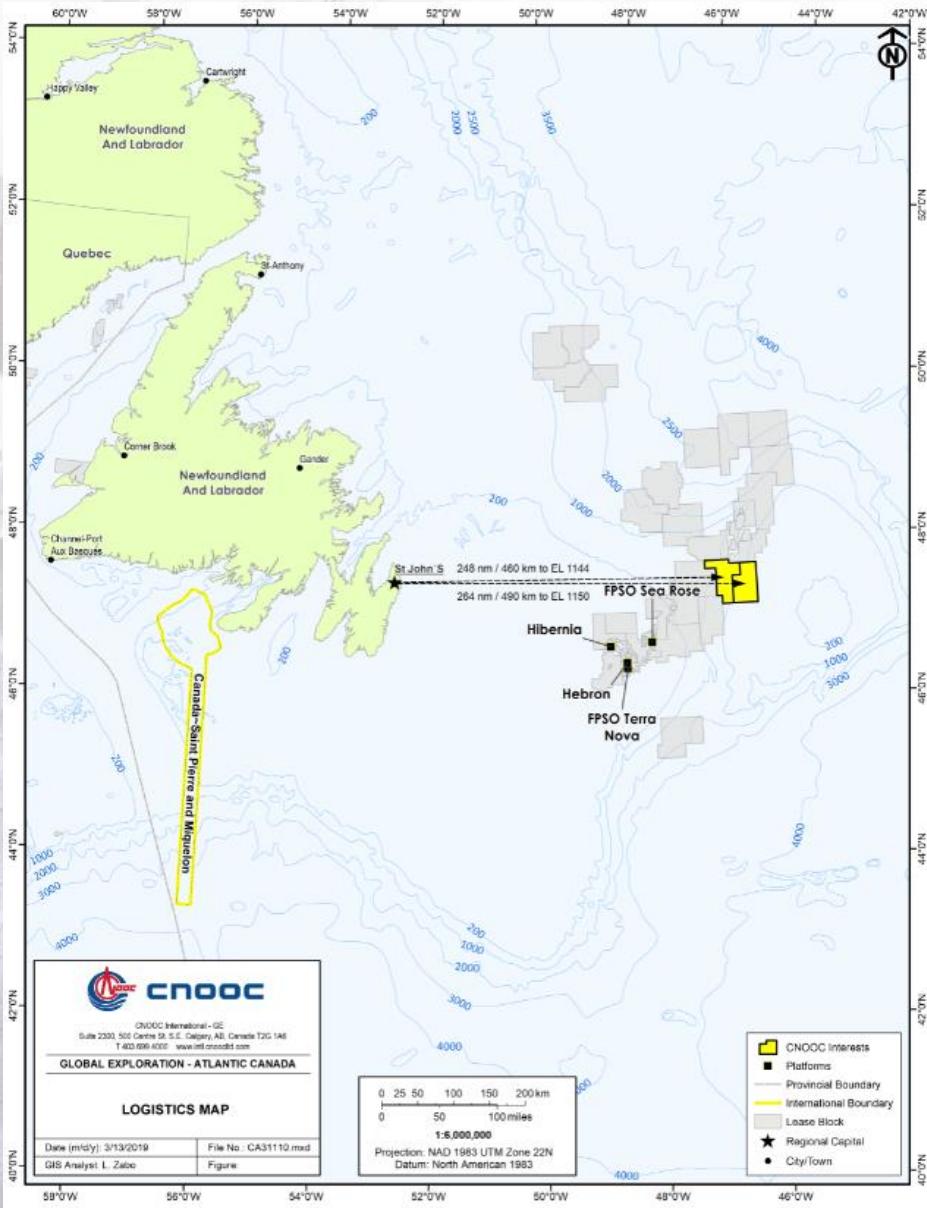

Understand and follow through with your responsibilities related to Safety Management.

Win Together

Ask questions and collaborate with others to achieve best-in-class results in Safety Management.

Project Overview

Newfoundland & Labrador

CNOOC Petroleum North America ULC Flemish Pass Exploration Drilling Project

Key Project components and activities include:

- 2019 GPA Visual Seabed Survey
- 2020 Drilling activities planned for one well with a second well option

Stena IceMAX contracted for 2020 campaign

AS-ATC-PRA-0054

CNOOC International Limited

Flemish Pass Exploration Drilling Project Environment Protection Plan

Conformance with this Procedural Aid is mandatory.
You may not 'opt-out' of any requirement identified herein.

Uncontrolled if Printed

Environmental Protection Plan (EPP)

- Submitted in support of Operations Authorization
- Describes protection measures and compliance monitoring requirements
- Developed in compliance with applicable legislation and regulations
- Identifies substances approved for discharge

KEEP WITHIN CONTROL LIMITS REDUCE LIKELIHOOD

- Management Systems
- Equipment testing, certification
- Training and Competency
- Rig Safety Case
- Multi-barrier policies (BOP)

CONTROL
&
BARRIERS

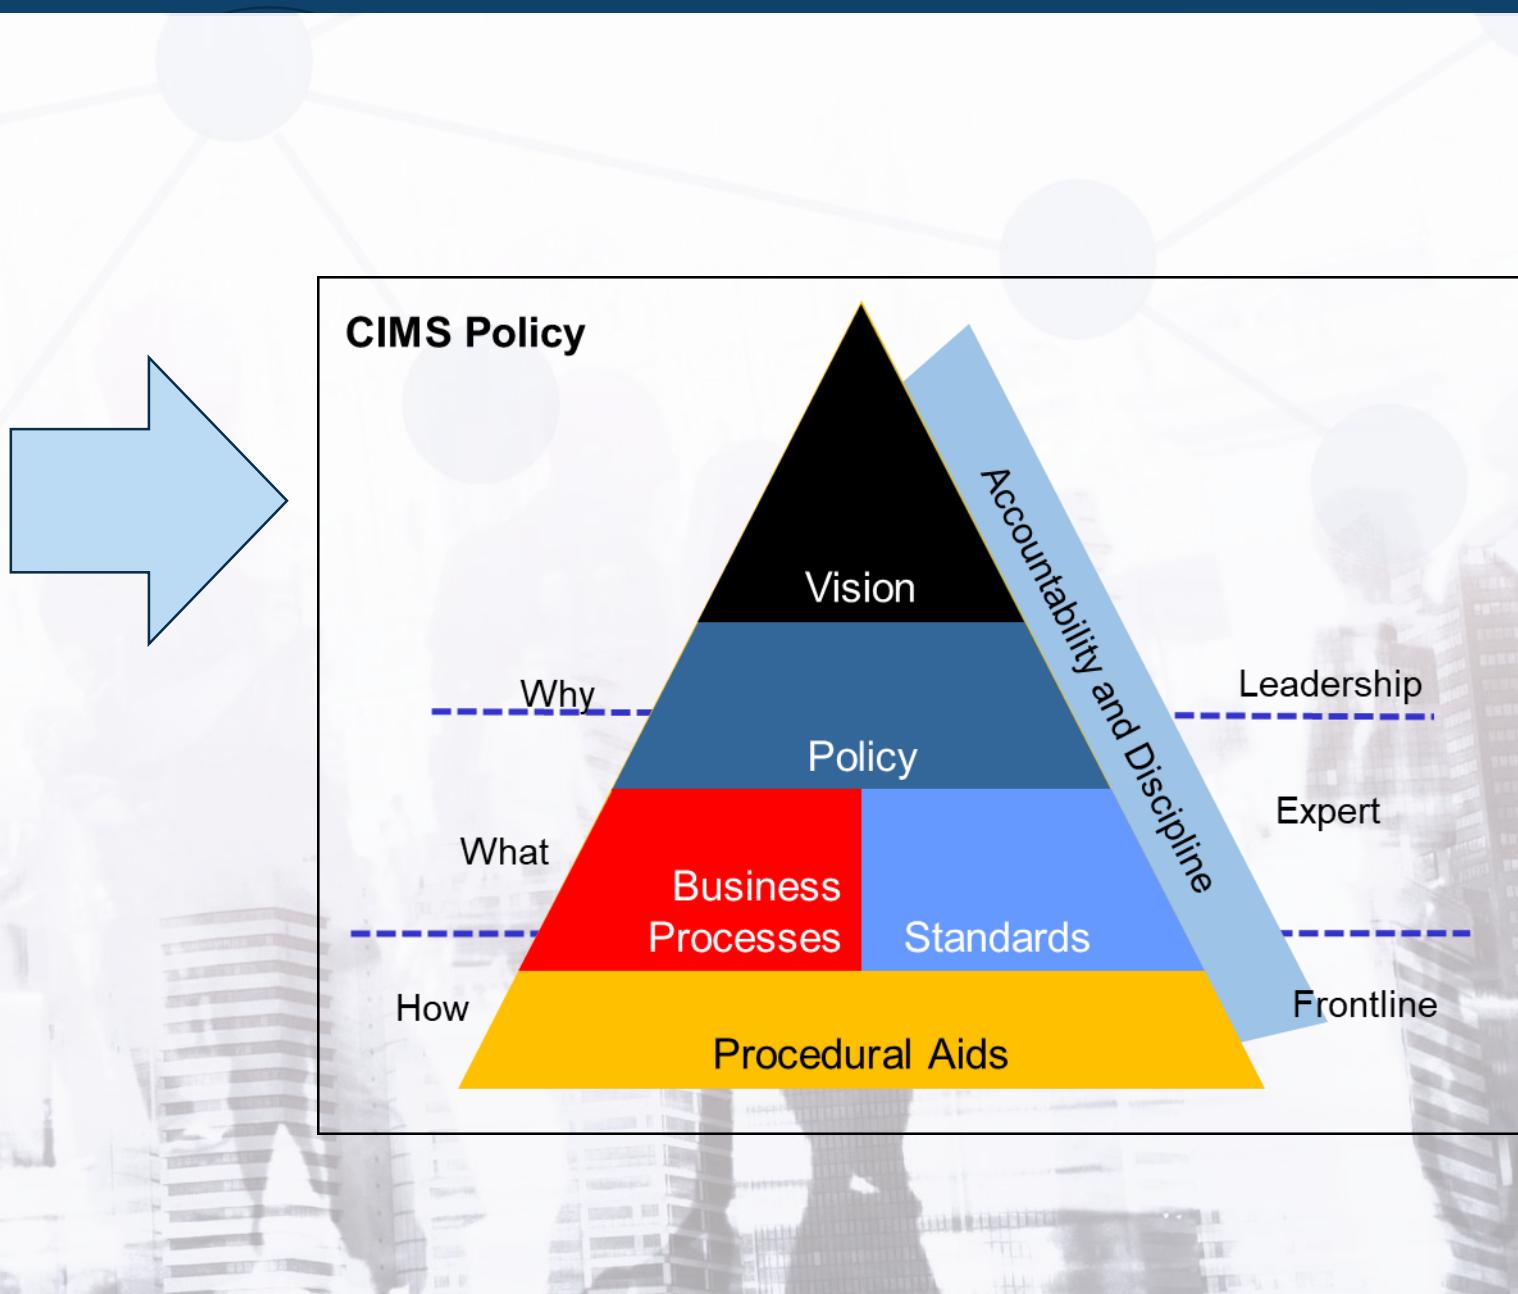

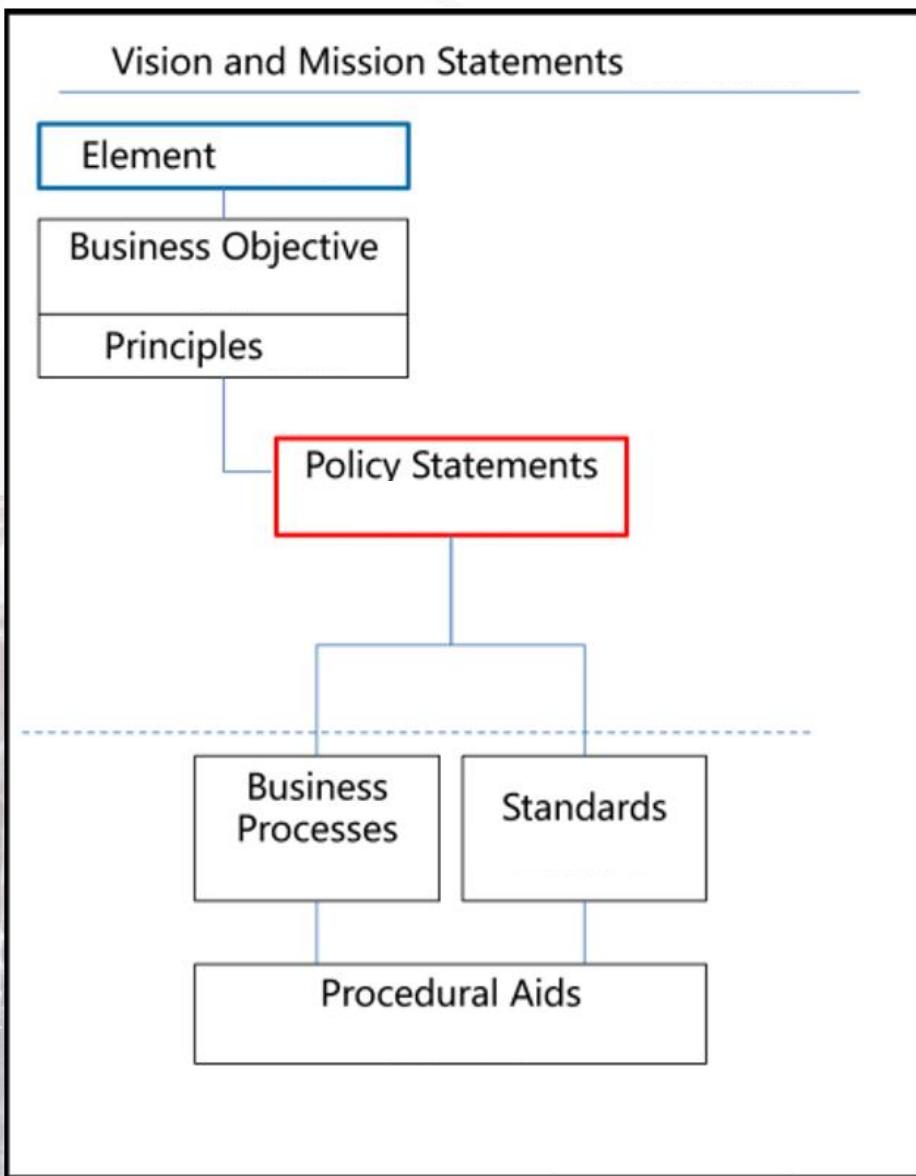

INCIDENT

RESPONSE
&
RECOVERY

MITIGATE CONSEQUENCES PLAN FOR RECOVERY

- Blowout Preventer
- Blowout Contingency Plan
- Oil Spill Response Plan
- Cap and Contain Equipment
- Relief Well Plan
- Technical expertise
- Emergency Response Team

Management Systems

1

Rig acceptance in accordance with CNOOC International Management System

2

Third Party inspections and verification of equipment/processes

3

Certification Authority verification and approval for equipment used on project

4

Internal Inspections and Audits

**Atlantic Canada Offshore Petroleum
Industry: Standard Practice for the
Training and Qualification of Personnel
is the primary guidance**

**In addition to meeting these requirements
CNOOC:**

- Provides Environmental Protection Plan awareness training to all personnel that will be involved in offshore project operations**
- Conduct contractor assessments to ensure compliance with our policies and procedures**
- Conducts contractor assessments to ensure compliance with their own policies and standards**

Atlantic Canada Offshore Petroleum Training and Qualifications Committee

STANDARD PRACTICE

Atlantic Canada Offshore Petroleum Standard Practice for the Training and Qualifications of Offshore Personnel

November, 2017

Stena IceMax Safety Case Demonstrates:

- Stena Drilling, the operator of the Stena IceMax, has an effective Safety and Environmental Management System (SEMS) in place.
- A detailed and systematic formal safety assessment has been performed which:
 - Identifies all hazards and associated credible accident events associated with the operation of the Stena IceMax
 - Shows that the risks associated with major accident events are appropriately managed and reduced to ALARP

Multi-Barrier Policies

CNOOC ensures that two independent and tested well barriers are in place during well operations

In the event of a barrier failure, only activities intended to restore or replace the barrier take place in the well

Must ensure that no single barrier failure will result in a release to the environment

THANK YOU
