Re: TGS NOPEC Geophysical Company ASA and Multi Klient Invest AS's Offshore Labrador Seafloor and Seabed Sampling Program, 2014-2019, Environmental Assessment

On April 8, 2014, TGS NOPEC Geophysical Company ASA (TGS) submitted to the Canada-Newfoundland and Labrador Offshore Petroleum Board (C-NLOPB) an environmental assessment report for a proposed seafloor and seabed sampling program for the Labrador Offshore Area from 2014 until 2019. The enclosed report "*Seafloor and Seep Sampling Program-Labrador Offshore to Jeanne d'Arc Basin (2014 to 2019) Environmental Assessment*" (Stantec April 4, 2014) describes these activities for this area.

The environmental assessment report was completed in accordance with the scoping document prepared by the C-NLOPB on March 4, 2014.

Please review the enclosed environmental assessment report and forward comments to me no later than **May 7, 2014**. If you have any questions regarding the environmental assessment report, you may contact me (709-778-1431 or dhicks@cnlopb.nl.ca).

Yours truly,
