Subject: Hello from Susan Green: PEI, Canada- Oil and gas drilling in the Gulf of St Lawrence

Hello Elizabeth

I would like to say that I fully support Ellie Reddin's letter which outlines the dangers of drilling for oil and gas in the Gulf of St Lawrence. I am very happy that this effort is connected to the David Suzuki Foundation and I hope that this will raise awareness at the federal level.

I would like to suggest this, in addition to these initiatives: Submit the Gulf of St Lawrence to the UNESCO's World Heritage Site, as this organization recognizes ecologically fragile and endangered areas of the world. It is a long process but I believe it is well worth the effort.

Thank you and I look forward to your response.

Most sincerely
Susan Green
