Dear Mr. Scott Tessier

Re: Deadline Extended for Public Review of Draft Western Newfoundland and Labrador Strategic Environmental Assessment (SEA) Update Report

I would like to thank you for the extension providing this opportunity to comment on the SEA draft report. <http://www.cnlopb.nl.ca/pdfs/wnlsea/wnlseaupdateen.pdf> is quite a document.

Please be instrumental in preventing the catastrophic-like existence created and left in the wake of fracking from happening to us, here in Newfoundland. The total disregard for all life wherever fracking occurs is like watching the news on Syria.

Make the oil companies do the work to ensure safety and health before you permit them to change our lives irrevocably. While I don't believe The Western Newfoundland and Labrador Strategic Environmental Assessment (SEA) Update Report reads strong enough make this happen, I do believe that you, in your trusted position with our C-NLOPB, can use the significant items and prevent hydraulic fracturing in all its forms to extract shale oil from underneath the seabed in our part of the Gulf of St. Lawrence. Per <http://albertavoices.ca/> how can you possibly risk this anywhere? I believe Newfoundland should remain frack-free.

Thank you.

Sincerely

Elizabeth M. Campbell

Intent and Trusting Western Newfoundlander
