Attention: Mr. Scott Tessier

Dear Mr. Tessier:

Subject: Correction in White Rose Extension Development Plan Amendment

Subsequent to our submission of the White Rose Development Application Amendment (June 5, 2014), a typographical error was discovered. The intent of this letter is to allow Husky Energy to formally correct this error.

Section 5.4 of the White Rose Development Application Amendment states, "*Consideration of the current West White Rose depletion plan recoverable basis and the additional potential resources that may be developed from the WHP yields a combined potential recoverable resource of **17.1 10⁶m³**.*"

The potential recoverable resource number quoted was incorrectly stated. The correct sentence should state, "*Consideration of the current West White Rose depletion plan recoverable basis and the additional potential resources that may be developed from the WHP yields a combined potential recoverable resource of **18.3 10⁶m³**.*"

The correct value of the total potential recoverable resource was correctly stated in the Executive Summary and recoverable resources are further defined in Table 5-2.
